CAREER OBJECTIVE

A dedicated undergraduate seeking a Data Analyst role to apply knowledge of data analysis, with skills in Python, SQL, and data visualization tools. Currently advancing knowledge in data science techniques, with the aim of leveraging analytical abilities to solve real-world problems and support strategic business decisions.

EDUCATION

Bachelor of Information & Communication Technology (Hons.)

2023 - Present

University of Vavuniya, Sri Lanka

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning & AI: Scikit-learn, TensorFlow

Data Science: Pandas, NumPy, Matplotlib, Data Preprocessing

Databases: MySQL

Data Visualization: Matplotlib, Seaborn, Power BI, Excel

FEATURED PROJECTS

AI-Based Road Damage Detection System

- Developed a machine learning-based system to detect road damage in Sri Lanka using image processing and AI techniques, demonstrating the ability to build intelligent solutions and analyze real-world problems using data.

[GitHub: SE Project](#)

Heart Disease Analysis Dashboard (Power BI)

- Created an interactive dashboard to analyze heart disease data, including KPI metrics and visual insights, highlighting skills in data visualization, dashboard design, and business insight generation.

[GitHub: heart-disease-](#)

Home Service Management System

- Developed a web-based system using PHP and MySQL to connect customers with service providers, showcasing the ability to build full-stack applications and manage databases effectively.
