CAREER OBJECTIVE

Software engineering undergraduate with hands-on experience in full-stack development, database management, and AI-based applications. Skilled in React.js, JavaScript, PHP, MySQL, and REST APIs, with experience developing real-world web projects and intelligent solutions. Seeking a software engineering opportunity to apply my skills and grow as a professional developer.

EDUCATION

Bachelor of Information & Communication Technology (Hons.)

2023 - Present

University of Vavuniya, Sri Lanka

TECHNICAL SKILLS

Programming: Python, Java

Frontend: React.js, Vite, CSS

Backend: Django, Django REST Framework, Flask, REST APIs, PHP, JavaScript

Machine Learning & AI: Scikit-learn, TensorFlow

Data Science: Pandas, NumPy, Matplotlib

Databases: MySQL

Data Visualization: Matplotlib, Seaborn, Power BI, Excel

Tools and Platforms: Git, GitHub, VS Code, XAMPP

FEATURED PROJECTS

Student Information Management System

Developed a web-based Student Information Management System to efficiently manage student records, academic information, and administrative activities, with secure user authentication and CRUD operations for managing student data.

GitHub: [Student Information Management System](#)

Home Service Management System

Developed a web-based system using PHP and MySQL to connect customers with service providers, showcasing the ability to build full-stack applications and manage databases effectively.

GitHub: [Home Service Management System](#)

AI-Based Road Damage Detection System

Developed a machine learning-based system to detect road damage in Sri Lanka using image processing and AI techniques, demonstrating the ability to build intelligent solutions and analyze real-world problems using data.
